

CONTINUED EDUCATION COURSE:

# DESIGNING TO ELEVATE THE HUMAN EXPERIENCE IN THE ERA OF AI

AIA COURSE: FOM102 | IDCEC COURSE: CEU-122954

This session is designed to invite an organic conversation about designing your space while using AI for support. In this course, we will be talking about using AI to streamline your workflow as well as using it as a generative tool for ideation and creativity to fuel your imagination.

## LEARNING OBJECTIVES:

## COURSE ACCREDITATION:

**1 EXAMINE**  
the impact of design on improving and enriching human experiences, emphasizing the significance of human-centered principles and the role of inquiry-based approaches in design.

**2 OUTLINE**  
the distinct characteristics inherent to humans and draw comparisons between these attributes and the present abilities of artificial intelligence.

**3 EXPLAIN**  
the emerging relationship between design and AI and be able to discuss how AI and design can both contribute to elevating the human condition and how designers can shape that relationship.

**4 DESCRIBE**  
actionable next-step strategies to integrate artificial intelligence into the design process to enhance and uplift the human experience.

1 American Institute of Architects  
(AIA) Learning Unit credit (1 LU)

Approved and registered with the International Design Continuing Education Council (IDCEC) for 1 continuing education credit

## COURSE AVAILABILITY:

Schedule a free in-office Lunch & Learn and your Fōmcore Representative will deliver an AIA registered learning unit.

When you're ready to book your Lunch & Learn, contact [mktg@fomcore.com](mailto:mktg@fomcore.com)!
