CONTINUED EDUCATION COURSE:

USING DESIGN TO ELEVATE THE HUMAN EXPERIENCE IN THE AI ERA

AIA COURSE: FOM102 | IDCEC COURSE: CEU-122954

This session is designed to invite an organic conversation about designing your space while using AI for support. In this course, we will be talking about using AI to streamline your workflow as well as using it as a generative tool for ideation and creativity to fuel your imagination.

LEARNING OBJECTIVES:

1 EXAMINE
How design improves human experiences by focusing on designing with people and using inquiry to ask the right questions that drive design.

2 COMPARE
What makes humans unique to the capabilities of artificial intelligence and what it can do now.

3 DISCUSS
The relationship between design and AI and how they can improve people's lives. Discuss the role designers play in this process.

4 DESCRIBE
Ways to include AI in the design process to enhance and uplift the experience of humans.

COURSE ACCREDITATION:

1 American of Architects (AIA) Learning Unit credit (1 LU)

Approved and registered with the International Design Continuing Education Council (IDCEC) for 1 continuing education credit

COURSE AVAILABILITY:

Schedule a free in-office Lunch & Learn and your Fōmcore Represenative will deliver an AIA registered learning unit.

When you're ready to book your Lunch & Learn, contact **mktg@fomcore.com!**
